vet Cancer Test

**Ask us about
cancer screening
for your dog**

A woman with long dark hair is smiling and hugging a beagle dog from behind. The dog is standing on a green lawn, and a brick wall is visible in the background. The scene is bright and sunny.

Screening is the first step in catching disease early, which can allow for better treatment outcomes once diagnosed.

Suitable for older dogs (7 years and older) and those breeds at increased risk of developing cancer in their lifetimes (from 4 years)

ASK YOUR VETERINARY TEAM ABOUT THE TEST
